

Problem Statement:

Generate a list of Users with all user details mentioned below. Create Basic form to SignUp or Register, Login and display User Details in Home Page along with Logout Option.

Note: Use HTML5, CSS3 and **ES6 Syntax**, **json-server port:3000**

Forms: Login Form, Sign Up form, HomePage

In ES6:

<http://localhost:3000/users/signup> should add new user record into users.json file.

```
const signup = () => {  
  //code for singup  
}
```

<http://localhost:3000/users/login> should allow valid user to navigate to homePage.

```
const login = () => {  
  //code for login  
  //if user is valid, navigate to home page  
  // else display message in alert : invalid credentials  
}
```

In Home Page <http://localhost:3000/users/login> should display all Users, use fetch to call APIs ,display data in Table .

```
const listUsers = () => {  
  //list all users fetched from URL  
}
```

Upon click on Logout Button, login page should be displayed.

```
Const logout = () => {  
  //code for user logout  
}
```
